

# Where Can I View Alaska Public Health Training?

APHTN is broadcast by the University of Alaska Southeast. Many communities carry UA only and are listed as constant broadcast. Some air a variety of programming and switch satellite feeds throughout the day. These communities are listed as varied broadcast. If you are in a varied broadcast community and the wrong program is showing, call the number for your community. If your community has a constant broadcast and the wrong program is showing, please call our toll-free number.

If you do not see your community, contact your local cable company to request this public service in your area. UAS media services provides cable equipment and technical assistance to those that choose to participate.

The following communities volunteer to broadcast our programs on their public access channel:

**Anchorage** channel 9  
varied broadcast
